

Computer Science student skilled in C/C++, Python, C#, SQL, and development tools including VS Code, MySQL, Git, and Microsoft Teams/Azure. Combines technical expertise with professional communication and documentation experience as a Public Safety Officer, collaborative knowledge from both project experience and through extra-curricular activities

EDUCATION

Bachelor of Science in Computer Science
Lewis-Clark State College (LCSC) | Lewiston, ID

Expected May 2027

PROJECTS

- Maze Animation in Blender**

November 2025

 - Developed a program that would procedurally create a maze and then have a camera traverse through the maze, including animated objects demonstrating ability to follow instructions prescribed by the project.
 - All objects and animations were created programmatically in Python, demonstrating knowledge of Blender’s API and skill with Python.
- Flutter Budgeting App**

January 2026 - ongoing

 - Developer for a budgeting app using Flutter and Supabase.
 - Implemented features include the home screen, user authentication, and initial table setup of Supabase.
 - Collaborated with a team of four, utilizing agile principles to plan, develop, and test app features.
 - Developed front-end components in Dart and integrated database connectivity using Supabase API.

WORK EXPERIENCE

- Public Safety Officer**

June 2023 – Present

LC State Public Safety | Lewiston, ID

 - Ensure campus safety by conducting routine inspections, responding to incidents, and documenting all actions with detailed, professional reports.
 - Communicated clearly and efficiently with team members via radio and email to coordinate safety measures and incident response.
 - Maintained accurate records of incidents, inspections, and safety procedures to support accountability and compliance.
 - Developed strong problem-solving and situational awareness skills while managing multiple responsibilities in a fast-paced environment.

CAMPUS INVOLVEMENT

- First Scholars Committee**

January 2025 - Present

 - Collaborate with campus partners to identify barriers impacting first-generation student participation in support programs.
 - Contribute ideas and solutions to improve engagement and access to resources for first-generation students.
- LC Computing Club**

March 2026 – Present

 - Co-founded LC Computing Club to foster collaboration, technical learning, and professional development among computer science students.
